REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Instant independent claim 1 is allowable over the prior art in the specific mounting bracket for connecting of an acoustic sensor assembly to an inside wall of a sonar dome. The novel and unobvious mounting bracket structure claimed includes a first protrusion, bonded at a first end to the inside wall of the sonar dome and having a widthwise extending slot, a second protrusion also bonded at a first end to the inside wall of the sonar dome and having a widthwise extending slot, opposed to an in alignment with the first slot. Further, at least the first or second protrusions are sufficiently flexible to permit bending of the protrusion to facilitate insertion of an acoustic sensor element into the first and second slots.

Instant independent claim 11 is allowable over the prior art also in the specific mounting bracket for connecting of an acoustic sensor assembly to an inboard surface of a shell. The novel and unobvious mounting brackets each include two protrusions, which are spaced apart to release and receive sensor elements and are adapted to snap toward each other when not restrained.

Dependent claims 2-10 and 12-15 are allowable at least for the above reasons.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
